To whom it may concern:

I am writing this letter in support of Karen Sylvester and the Prevention Management Organization.

The Prevention Management Organization has been crucial to our department in providing education on underage drinking, suicide prevention, lock boxes, tobacco use and binge drinking. Without their support we could not educate the public to the extent we do. The Prevention Management Organization also keeps us up to date on the latest information they receive to help us help our communities and our citizens.

Prevention Management Organization is a great asset to our county and it would be a devastating loss not having them work with us disseminating safety and resource information to our community. They're also crucial in educating those in our community on the current dangers, scams and trends to be aware of.

Sincerely,

Kenneth G. Blackburn
