To Whom It May Concern:

The Prevention Management Organization is a wonderful supporter to Fremont County. They support prevention efforts for drugs, alcohol, tobacco and suicide. I have pleasure of working side by side on many committees and see the dedication and tenacity these professionals display. They enhance the efforts of the committee members by providing the latest research data, attending city council meetings with the teams, and providing support to the leaders of the coalition and suicide prevention task force. Without the Prevention Management Organization the Fremont County Prevention Coalition and Suicide Prevention Task Force would not obtain the goals each year. They are truly an asset to our community.

Sincerely,

Rebecca Parker, MS, LPC
Clinical Director
