To whom it may concern:

I want to acknowledge the value Becky Mortimore adds to the community of Thermopolis both through my involvement with her here at the Hospital (Hot Springs County Memorial Hospital) and in the community. Becky, through the Community Prevention Management Organization office, has been integral in helping the town of Thermopolis' businesses go smoke free. She is a constant voice in the community for the cessation of drug use in our children and adults and has presents in both the schools and the community.

I personally would like to note the assistance she has provided me in our Community Health Needs Assessment for the Hospital. This report is required of Critical Access Hospitals that are non-profit, and must be completed every three years. Becky has helped in both a venue to meet and discuss the elements with leaders in our community, but also has provided materials to facilitate the project. Her assistance has been vital both now, in the development stages, but will be critical as we move forward and look to measurable changes and support from our community.

Becky is also very adept at sending out information in the form of news stories and updates with regard to both legislation and drug information as it is trending. I appreciate being on the forefront of the news thanks to her constant updates and information she provides.

Becky is a valuable member of the Thermopolis community, and should be commended for her hard work and dedication to her cause. I look forward to working with her in the future.
