To whom it may concern

I have been a School Resource Officer (SRO) for ten years working with the Fremont County School District #25. In my capacity as a SRO I have been involved with a lot of different programs dealing with students. Camp POSTCARD, Cowboy Ethics, Ready to Ride (bull riding school), wrestling, bike rodeo's, Life R U Ready, Challenge Day and Juvenile Mental Health just to name a few. The PMO folks have always been willing to support my efforts and the efforts of others in the community in any way they could. They have helped financially when they were able and volunteer their time and talents when they can. The PMO in our community has helped make our community safer and helped to not only educate our children, but adults as well. Their messages about drug and alcohol abuse and making good choices in life are so important for our youth to hear.

I can honestly say that the programs I am involved with would not be successful as they are without the support of PMO. I have worked alongside Kelly Rees on many projects and with youth organizations; she is a true warrior for the cause. She has never once told me she couldn't do something or didn't have the time to help me. That is rare to see in our society today, but I guess that's what makes her great at what she does.
