To Whom It May Concern:

Solutions For Life fully supports the State of Wyoming's efforts related to prevention. However, separating the money from mental health and substance abuse has created some challenges. Luckily, Solutions For Life has a closely collaborative relationship with our local PMO.

Improving quality of care is a priority within our community and has worked with our local prevention organization in the area of suicide prevention. One of our staff is trained in QPR (Question, Persuade, and Refer) and works to coordinate training for our community. Through this collaborative process we can achieve positive outcomes, including improved service delivery.

Through this collaborative process we can achieve positive outcomes and look forward to a continued relationship.

Respectfully,

Peggy Hayes, LMFT
