Mrs. Ranae Pape  
Community Prevention Professional  
Prevention Management Organization of Wyoming  
Sublette County Office

Re: Community Prevention Collaboration

Dear Mrs. Pape:

In the last 2 years Southwest Counseling Service (SCS) and yourself, community prevention professional, of the Prevention Management Organization (PMO), for Sublette County have formed a collaborative relationship regarding prevention efforts in our community. I look forward to continuing this as the benefits have been greatly felt by our small towns.

SCS looks forward to continuing our current and ongoing collaborations as follows: Mountains of Hope Suicide Awareness walks and candle light vigils; coordinating services for at risk/crisis situations; distribution of gun locks and gun safety education; community wide prescription safety education and disposal; educating local elected officials of prevention efforts, needs, and suggested local ordinances; continuing efforts to improve the Title 25 process; QPR trainings for staff, stakeholders, and clients; ASIST trainings for staff and recovery mentors in our community; annual, local Grateful Gathering event support; annual National Recovery Month Awareness support; information and support for clients on tobacco cessation; SCS, Pinedale, sober living house support; informative posters/materials; and community wide efforts through the Prevention Coalition.

Of course, SCS, Pinedale, continues to invite additional collaboration with PMO in this community's effort to reduce substance use disorders, improve mental health wellness, and increase the quality of life in Sublette County. With this collaboration and the relationships formed, the mission of SCS is only furthered. Thank you for all of your efforts and dedication to prevention.

Sincerely,

Katherine M. Ryan, MS Clinical Psychology & Substance Abuse Counseling
