To Whom it May Concern:

I have had the opportunity to work closely with Ranae Pape, our local Community Prevention Professional, with activities which have, in my opinion, impacted Sublette County, WY, in a very positive way. I have personally attended coalition meetings, trainings and assisted with activities that I feel are invaluable for our communities.

The opportunities provided to Sublette County through the Community Prevention Coalition have enabled us to collect used prescription medications, assess the quantity of said items collected and dispose of the items in a safe manner as opposed to polluting our waterways or having the items wind up in the wrong hands. It sounds like a simple task, but takes the cooperation of several persons and organizations to make sure it is done in a legal and safe manner. Ranae has been involved from the very beginning with acquiring an additional container for collection and the means to assess the quantities collected while still working under the guidelines of the program.

I also had the chance to attend the QPR, Suicide Prevention, program conducted by Ranae in Pinedale, WY. I know from speaking to Ranae that she has presented the information to a wide variety of populations in Sublette County, WY, which has seen all too many suicides in recent years. Suicide isn't an easy topic to speak on, but Ranae utilized the resources provided by the Prevention Coalition and broke the ice so much needed discussions could take place in several different arenas in Sublette County.

I view the Community Prevention Coalition as a much needed and valuable resource for not only Sublette County, but state wide. Having the opportunities provided with such an energetic and devoted Community Prevention Professional make this a win-win situation for everyone involved economically and opportunistically.

Thank you for your consideration.
