Cheyenne, WY 82001

**Steffanie and Mikki-**

I am writing to express my support of the Laramie County and statewide offices of Prevention Management Organization of Wyoming.

I have had the privilege of working with the local coalition for two years and with the statewide office for the past year and feel that the work done on both a local level and across the state is invaluable. The organization has tremendously increased the levels of awareness and education for important issues such as substance abuse and suicide prevention in Wyoming. Through local coalitions that the PMO has been key in developing, we are able to have increased access to research and resources that enable community members to take action in local prevention efforts.

Through continued collaboration and partnerships, the Prevention Management Organization is on the right path to creating a healthier Wyoming. I commend you and the other members of the PMO for the efforts made daily to accomplish the goals established by the local coalitions. You are making our Wyoming communities better!
