To Whom It May Concern:

Please support funding for the Prevention Program in Wyoming. We are a member in the local Task Force and we believe it is extremely important that the programs continue. We have had a significant number of suicides and attempted suicides in our area and the Task Force has worked hard on communicating all resources available for help. In addition, programs such as tobacco cessation and education on alcohol and drug abuse has also been developed and shared in our community.

We believe the work through our Community Prevention Professional for Weston County has made an impact and our collaboration with the program has helped improve the health of the citizens in our area.

We hope that you take the work that they provide very seriously and continue with the funding of this much needed program. If you should have any questions, please do not hesitate in contacting me at 307-746-3733 or mcadwell@wchs-wy.org.

Thank you.

Sincerely,

Maureen Cadwell, CEO
