RE: PMO

TO: Whom It May Concern

Dear Sir or Ma'am:

As a private practice mental health therapist, I access the local prevention program coordinator on a fairly frequent basis, on behalf of my clients and also in the cause of continuing to build prevention programs in this area. The program coordinator contacts me regularly about educational information, needs, projects in progress, and opportunities for me to participate in those projects as a professional in this community.

The resources and educational material provided by the program coordinator are very helpful – several of those resources are in my office, available to my clients. That availability helps us start addressing issues that affect the clients' clinical status right away.

The ability to work with the program coordinator to help address issues that impact our community is invaluable. I have seen attitudes shifting over time towards healthier choices and I also see a more cohesive and informed approach to addressing the issues of addiction and suicide prevention.

The continuity of the prevention message and its related projects and the ability to have this program locally, to reflect this community's values and needs are the components that make prevention efforts effective in Thermopolis and Hot Springs County.

Please accept this letter as a statement of my support for our prevention program and the work it helps us do in bettering our community.

Very Truly Yours,

Catherine L. Crumpler, M.A., LPC, BCPC, NCC
